WEDNESDAY, JANUARY 21, 1880.

Bob Ingersoll's Eloquent.

HIS SPEECH AT THE GRANT RECEPTION IN CHICAGO.

Gen. Sherman said:

Gentlemen—I now invite your attention to the twelfth regular session of the Union Army, whose valor and patriotism saved to the world a government of the people, by the people, and for the people."

Response by Col. Ingersoll.

An ovation greeted the orator as he mounted the table and smiled on the vast collection of hearers. It was kept up at frequent intervals during the course of the following response:

"When slavery, in the savagery of the lash, and the barbarism of the chain, and the insanity of secession [applause] confronted the civilization of our country, the question, 'Will the great republic defend itself?' trembled upon the lips of every lover of mankind. [Applause.] The grand North filled with intelligence and wealth, the products of labor, marshaled her hosts and asked only for a leader. From the people a man, silent, thoughtfully poised and calm, stepped forward, and with the light of victory voiced the nation's first and last demand—unconditional and immediate surrender. [Applause.] From that moment the end was known. That utterance was the first real declaration of real war, and in accordance with the true meaning of mighty events, the soldier who made it received the final sword of rebellion. [Loud applause.] The soldiers of the republic were not seekers for vulgar glory, neither were they distinguished by the pomp and circumstance of a military career. They were the defenders of humanity, the destroyers of prejudice, the breakers of chains and, in the name of the future, the saviors of the nation. They finished what the soldiers of the revolution commenced. They have reaped the torch that fell from the hands of the fathers and the world again with light. They blotted out from our statute books the laws passed by hypocrites at the instigation of robbers [loud applause], and tore with brave and indignant hands from the constitution of the United States that infamous clause that made men the catchers of their fellow-men. [Applause.] They made it possible for judges to be just, for statesmen to be humane, and for politicians to be honest. [Loud applause and cheering.] They broke the shackles from the limbs of slaves, from the souls of masters, and from the Northern brain. They kept our country on the map of the world and our flag in heaven. [Applause.] They rolled the stones from the sepulchres of progress, and found therein two angels clad in shining garments—Nationality and Liberty. [Loud applause.]

The soldiers were the saviors of the republic; they were the liberators of men. In writing the Proclamation of Emancipation, Lincoln, greatest of our mighty dead [applause], whose memory is as a gentle summer air when reapers sing amid gathered sheaves [applause], copied with the pen what the grand hand of fate had written with the sword. [Applause.] Grandeur from the Greek, nobility from the Roman, the soldiers of the republic, the patriots as careless as the air, fought for the right of the nation, for the nobility of the race, and for a mother might own her child [loud and prolonged applause]. That arrogant idleness should not scar the back of patient toil [cheers], and that our country should not be a nation of slaves, but a nation of free States, but a nation, sovereign, grand and free. [Applause.] Blood was water, money was leaves, and life was only common air, until one flag floated over one republic, without a master and without a slave. [Prolonged applause and ringing cheers.] And then was asked the question, will a free people voluntarily tax themselves to pay a Nation's debt? The soldiers went home to their waiting wives, to their glad children, and to the girls they loved. [Laughter and applause.] They went back to the fields, the shops, the mines. They had not been demoralized. They had been ennobled. [Cheers.] Mocking at reverses, laughing at poverty, they made a friend of toil. They said, 'We saved the nation's life, and what is life without honor?' [Loud applause.] They worked and wrought with all of labor's royal sons, that every pledge the nation made might be redeemed. [Cheers.] And their great leader having put a shining band of friendship, a garland of clasped and loving hands, round the globe, came home to find, and finds, that every promise made in war has now the ring and gleam of gold. [Enthusiastic cheers.]

There is another question still. Will all the wounds of war be healed? I answer, yes. [A voice, 'God.'] The Southern people must submit. [A voice, 'Thank God.'] Not to the dictation of the North, but to a nation's will and the verdict of mankind. [Great applause.] They were wrong, and the time will come when they will say that the people are the victors who have been vanquished by the right. Freedom conquers them, and freedom will cultivate their fields, will educate their children, will weave robes of wealth, will execute the laws, and fill their lands with happy homes. [Fervent applause.] The soldiers of the Union saved the South as well as the North. [More applause.] They gave us a nation [a voice, 'with a big N.']. They gave us liberty here, and their grand victories have made tyranny the world over as insecure as an ass upon the lips of volcanoes. [Ringing applause.]

And now let us drink to the Volunteers, to those who sleep in unknown and sunken graves, whose names are known only to the hearts they loved, and to those who sit in happy dreams can see the footsteps of return. Let us drink to those who died without lifeless fame mocked at want. Let us drink to the maimed whose scars give modesty a tongue. Let us drink to those who shared, and gave to chance the care and keeping of their lives. Let us drink to all the living and to all the dead—to Sherman and to Sheridan and to Grant, the laureled soldier world [ringing and lasting applause], and last to Lincoln, whose loving life, like a low of peace, spins and arches all the clouds of war.

Life of Charles Lever.

Mr. Fitzpatrick's "Life of Charles Lever," which the Harper's have promptly brought out in their Franklin Square Library, is a very interesting book, full of anecdote and romances about the rollicking Irish author. Lever's personal appearance, as he was when pursuing his studies, is thus described by one of his early friends:

"I remember seeing about this time, in the courts of Trinity College, Dublin, some eight or ten young men gathering round a figure that out-topped them; every now and then a peal of hearty laughter burst forth from the group, which was scattered for a moment as if recoiling from the explosion of a shell, and then once more swarmed like bees round the central figure. This naturally attracted my attention, and I asked a bystander what it was all about. Oh! it's only Charlie Lever, all the fellows are running after him like mad." I had frequently heard the name before, but it was the first time I had ever seen the man, who was the kindest and most true-hearted friend any one could rely on. I approached nearer, and must confess that the first superficial glance was not quite satisfactory. I saw, indeed, a tall, athletic, erect and manly figure, that never rested for a moment, but kept veering and lurching about, the head being fixed for an instant to deliver a shot as some of the skirmishers who came to close quarters, or thrown backward in hearty enjoyment of some happy repartee; but this figure was clad in the most ordinary of garb, the sole exception of his boots and as much of his shirt as was visible, in one uniform suit of Lincoln green, cut after a German fashion totally new to me. I perfectly remember that I muttered to myself, 'This is the green man

become restless; but I went nearer, hoping to catch a glimpse of his head. In this I only partially succeeded, for Lever then wore a profusion of long hair hanging in wavy curls over his neck. After a time, indeed, I caught a good view of his wonderfully expressive face, his kindly smile, his brilliant though somewhat deeply-set eyes, that sometimes flashed fire and then again twinkled with mirth, but I am not a portrait painter, and the impression made by that same face when I saw it for the last time one afternoon in June, 1871, is still so vividly and regretfully impressed on my memory that I cannot even attempt to describe what it was in all the glow and fervency of youth, strength and hope; all I can say is that the old face was to me equally attractive as the young one had been, and an expression was, as though chastened and overcast even then by the shadow of death more affectionate and tender than ever. That last loving look can never be forgotten."

A Complete Clarification of Cane Juice.

It may seem strange that until the present day, after so many years of observation and experiment, and despite the scientific skill that has been brought to bear on the subject, this should remain a test question on the sugar industry. This is so, we have only to see the extreme care and attention that is given to "liming" in all the better managed estates in the colonies; how a variation in the quantity of lime is thought often to be scrupulously necessary with every variation in locality from which the cane may be brought, &c. The processes and modifications of processes that have been patented and practiced with this end in view are too numerous to mention; too much has been attempted and too much left undone through sheer scientific ignorance.

For some years back, as a chemist, I have made a study of the sugar question, more especially as it is represented by the raw and refined articles, and always take a great interest in its progress. Recently, during a visit to the colonies, I have had opportunities of extending my knowledge and experience on the subject, and was induced then, as now, to recommend the following as among the least expensive and most effective methods of producing a complete clarification of cane juice, claim nothing new or original in the materials used, as these have been employed and discarded over and over again; but the method of application embodies its success, and so far as it has been tried has been attended with gratifying results.

The juice is defecated in the usual manner, but with this difference and one on which I place great importance: that instead of "liming" as is usually practiced, about 2 lbs extra lime over and above the usual quantity is to be added,—the heating, cracking, and skimming to be conducted as formerly,—then to this alkaline juice, which must be allowed to settle well, from 1 to 1½ per cent of pure bisulphite of lime, of specific gravity 1000° S, is slowly added as the liquor runs to the wall; this is effectively done by placing the required quantity in a tub above the gutter which conveys the juice to the mill; and, by means of a plug in the bottom, it can be so arranged as to empty itself in the same time as the clarifiers, and thus become distributed throughout the whole mass. At this stage it will be observed that the liquor on the wall is slightly acid to test paper, but as it begins to dry this acid becomes volatilized, leaving, if properly manipulated, a perfectly neutral syrup of a pale transparent yellow color, on which any further addition of lime or bisulphite of lime should produce no effect, that is to say, the line should produce no precipitation of organic matters, and the bisulphite of lime no further bleaching action,—any colors that still remain being beyond the power of bisulphite of lime or sulphurous acid to remove.

The sugar produced from such a syrup is not up to the standard of that prepared by adding vitriol to the pan before striking out, but, I maintain, that by working in this way, with slight and subsequent neutralization of this excess by the inert sulphurous acid, that it has produced all that has been claimed for it, viz., the complete removal from the juice of all organic bodies having a prejudicial effect on the yield of cane sugar. Any impurities that still remain consist of mineral matters and coloring matter of an organic nature allied to chlorophyll, and this has been done without inverting any one sugar, and I doubt not that if syrup as it runs from the subsidors to the vacuum pan was treated with pure sulphurous acid, either in the gaseous or liquid state, a class of sugars could be prepared that would compare favorably with the best, while in any way decreasing the yield, and would certainly produce a better yield of molasses sugar.

A very noticeable feature in the process is the beautiful appearance the liquor presents in the well, where it is so transparent and light colored that the bottom of the tech can almost be seen through the mass of liquid, and the acid that usually requires so much sweeping to remove is conspicuous by its absence.

A popular error exists as to the injurious effect on cane juice of any excess of lime, that this is the case is contrary to fact, at least so far as the cane sugar of the juice is concerned, which it has no action. Any prejudicial effect which it may possess only exists inasmuch as it is allowed to pass through every stage of the process to completion in a free and uncombined state, when it would tend to re-dissolve, in part, the precipitated albuminous matter, and to combine with the glucose forming dark colored products, only in a secondary sense effecting the yield but not actually destroying the cane sugar. By adopting my process this alkalinity is neutralized at an early stage of the process, and after it has fulfilled its function to the utmost. JOHN Y. McLELLAN, Glasgow, 12th November, 1879.

Secretary Evans and Mary's Little Lamb.

Few poems have been more generally admired or paraphrased in the vernacular tongues of earth than that commencing with the lines:

Mary had a little lamb,  
Its fleece was white as snow,  
And everywhere that Mary went,  
The lamb was sure to go.

Well, the story is now current, at the national capital, that the distinguished secretary of state, when recently in the company of his friends, was desired to condense into prose these immortal verses. Urgently solicited, Mr. Evans yielded and wrote as follows:

"Mary, a female judge to be of the race of man, whose family name is unknown, whether of native or foreign birth, of lofty or lowly lineage, and whose appearance, manner, and mental cultivation are involved in the most profound mystery which probably never will be fully ascertained, comes through the most profound researches of a historian admirably trained in his profession, who shall devote the ablest efforts of his life to the investigation of the subject unimpeded by either passion or prejudice, at the same time being utterly regardless of the platitudes or censures of the world, we are informed by one who, it has been stated, at one time while living in that part of the United States of America known as Massachusetts, where, whose families have frequently been involved in difficulties with the authorities of Great Britain and Empress of the Indies, whose domains extend over a large portion of the habitable globe, thereby endangering the peace which should so happily exist between nations of the same blood and language, had an infant sheep, of which there are many millions, of various stocks and qualities, now in our country, constantly adding wealth and prosperity to our republic and enabling us to be entirely independent of all other nations for our supply of wool, now ample for the use of factories already busily employed, and for those which are long will be constructed in all parts of the land, working both by water and steam power, and in whatever direction the said Mary traveled, this animal, whose fleece was snow white, even as the lofty mountain regions in the silent solitudes of eternal winter, as the ethereal vapors which oft float over an autumnal sky, darkly, deeply, beautifully blue, or as the lactical fluid, covered with masses of delicate foam, found in the buckets of the rosy dairy-maid, whether meandering through

the meadows in midsummer, gathering the luscious strawberry, strolling in the woodland paths in search of wild flowers, visiting the church with her uncles, cousins, and aunts, to listen to the inspired words which came from the lips of the minister of the sanctuary, or when retiring to her blissful couch to seek rest and enjoy sweet repose after the cares and labors of the day, in fact, 'everywhere' that Mary went, this youthful sheep, influenced, doubtless, by the affection which is so conspicuously manifested by the lower animals in their association with human beings, was ever observed to accompany her."

It is stated that, when the pause in the sentence came, the secretary, who had read it without an inspiration, resumed his stolid, diplomatic countenance, and all mirthfulness had departed from the faces of that once happy company.—Detroit Free Press.

WATER PIPES!

ALL PARTIES IN WANT OF GALVANIZED PIPING TO BE HAD FROM NEW MEXICO WILL DO WELL TO GIVE THE UNDERSIGNED A CALL. We have

60,000 Feet of Galvanized Piping

On hand, Just Received ex "Albatross" and "Gleaner" and can offer it at

THE LOWEST POSSIBLE FIGURES

By the "Morro Castle," just at hand, we have received a full line of

HOUSE PLUMBING MATERIALS

—SUCH AS—

Earth Closets, Cast Iron Sinks, Enamelled Cast Iron Washstands, Marble tops and Basins for Washstands, with Corks and Chains for same, Hose Bibb Cocks, Sewer and Sink Traps, Urinals, Kitchen Slop Sinks, Sink Plugs, Light Cast Iron Soil Pipe, 2, 3 & 4 inch.

All Work in the Above Line

Will be attended to with dispatch. Also, just at hand, a new lot of

UNCLE SAM RANCE,

Three different styles, of four sizes each. Also, Opera, May, Quartette and Ting Hou Ranges!

Together with the

Cotton Plant, Sunny South

Magna Charta, Osceola,

Demand, Buck's and

Charter Oak Stoves.

SUPERIOR FRENCH RANGES,

For Private Families, or Hotels, Ships' and Schooners' Caboose, Laundry Stoves, Kerosene Stoves

IF YOU ARE IN NEED OF ANYTHING IN THE ABOVE LINE! GO OR SEND TO

NOTT'S.

N. B.—In ordering stoves through the mail, and leaving the matter of delivery to the state limit, and the number of people you wish to cook for.
